WELCOME TO RBG CONCEPTS

The software developed by a financial professional to help other financial professionals.

RBG Concepts ® is a client presentation software that shows a simple picture of a client's proprietary and what percentage should be allocated where in order to maximize growth! This software was developed by Curt Whipple and The Top Advisors to help financial advisors, planners, and insurance agents better serve their clients. But don't take our word for it; read testimonials from other financial advisor who have implemented RBG Concepts ® into their own practices.

WHAT IS RBG CONCEPTS ®?

A software that splits a client's portfolio into three sections, each representing a different type of asset. First, red money is at-risk investments. Blue money is tax-free money OR alternative investments. Last, green money is principle protected money. RBG Concepts ® takes the guesswork out of diversifying a client's portfolio and instead uses technology that displays proper allocation of assets to you and the client.

Better yet, the tool also includes explanations for each of its choices that help the client get a better understanding of what is happening with their hard-earned money.

This incredible software took Curt Whipple's commissions from \$250,000 per year to \$2.7 million per year! Now, Curt wants to share his development and help other financial professionals increase their commissions as well.

POTENTIAL TO TRIPLE YOUR INCOME WITH THE SAME NUMBER OF CLIENTS!

Have you ever had a prospect come into your office after losing money with another advisor saying something like, “I told that other advisor I didn’t want a lot of risk and I just lost ___% in the market!”? Curt believes this is not the result of an advisor who is ignorant or doesn’t care about the client; instead, it’s an issue of the advisor not properly diversifying the client’s portfolio.

Curt helped me in using his proprietary software which has allowed me to tackle much bigger clients than I ever felt possible, and even more clients from \$200k-\$2m and they all seem to get it. For me, Curt helps me close the gap and helps close the deals. He has been truly great. I wish there were more guys in the industry like Curt.”

Mark K. GA

CURT WHIPPLE

Founder of RBG Concepts ®

Curt has been in the financial planning industry since 1981 and started his own financial firm, C. Curtis Financial Group in 1986. In 2001 Curt decided to create RBG Concepts ® with no idea how valuable it would be. Curt's revenue increased from \$200,000 per year to over \$2,700,000 per year after implementing this software and he never looked back! Curt now combines the knowledge and experience that helped him make a name as one the top advisors nationwide and created a coaching program around his amazing software that helps other financial professionals become more successful.
